

# Some Cool Sounding Buzzwords

Less Buzzy and Somewhat More Explanaotry Subtitle

Sanha Cheong

The main goals for this slide:

- ▶ This is just to show you how this *template* works
- ▶ There are two ‘emphasize’ functions used to highlight & italicize texts
  - ▶ ‘\empy’ does *this* and ‘\empr’ does *this*.
- ▶ The colors in this template is selected from the official Stanford Identity website:  
<https://identity.stanford.edu/color.html>
- ▶ Note that hyperlinks, by default, are not highlighted. Of course, you can change this: e.g.,  
*<https://github.com/sanhacheong/stanford-beamer-presentation>*

A (hopefully) useful function in this  $\text{\LaTeX}$  template is:

```
\examplebox{ExampleTitle}{ExampleContents}
```

which does this:

## Example of the Command `\examplebox`

This is what it does. Pretty self-explanatory, isn't it?  
Given the color them, I *recommend* using `\empr` inside of `examplebox`. The `\empy` command does not look *that* good.
